

Adventures in Diving

ADVANCED OPEN WATER

Good Job ... You're now a Scuba Diver!! Not quite sure what to do next? Or perhaps you have been diving for a while and would like to extend your scuba skills?

The Adventures in Diving Course is for you ...

The next step in "hands on" diving fun.

And There's No Test!!

Dosil's makes Advanced Scuba Training easy, fun and exciting, while providing the highest quality of instruction possible. Whether you're a newly certified diver or have hundreds of dives logged, the PADI Advanced Open Water Certification gives the confidence, skills and experience to take your diving to new levels of excitement. This certification level is required for diving on all boat dives off the New Jersey Coast.

PADI Adventures in Diving program has something for everyone. This In-Water, Performance based training consists of two "Core" dives to give you an orientation in the fundamentals of advanced diving techniques, and three "Elective" dives. The Core dives consist of a "Deep Dive" to allow you to visit the world below 60 feet and, a "Navigation Dive", to extend your compass and natural navigation skills. The Elective dive consists of three out of the four following dives: "Wreck Dive", "Search & Recovery Dive", "Peak Performance Buoyancy Dive", and "Underwater Naturalist". Each dive is supported by a chapter in your *Adventures in Diving* manual, a knowledge review, and briefings before and after each dive. These Adventure dives will also count as the first dive of the corresponding specialty course, towards the **Master Scuba Diver** rating.

After your program, you will be qualified to dive the great shipwrecks of the New Jersey coast to a maximum depth of 130 feet and navigate while diving.

EQUIPMENT REQUIRED: All standard diving equipment: Mask, Snorkel Fins, Boots, Weights & Weight Belt, Wet/Dry Suit, BCD, Surface Marker Buoy, Primary Dive Light, Adventures in Diving Multi Purpose Data Carrier, Whistle, Compass, Knife, Slate, Regulator, Log Book and any additional equipment required for your specific dives.

Adventures in Diving

AOW Dives

Deep Dive Under the direct supervision of your instructor you shall embark upon probably the deepest dive of your diving experience. Deep diving makes it possible to visit shipwrecks in deeper water, and provides occasions for underwater photographs that you cannot take in shallow regions.

Underwater Navigation Dive Finding your way is not a matter of luck! When everyone's buzzing about a reef or checking out a shipwreck, they're having a great time - until it's time to go. Then they turn to you, because as a PADI Underwater Navigator, you know the way back to the boat.

Wreck Diving The lure of exploring sunken pirate ships, naval ships and luxury liners is something most divers can't resist. This is the excitement of our own coastline with over 3,600 wrecks.

Search & Recovery Has your friend dropped something in the water? Are you looking for lost treasure? Now we will teach you effective ways to find objects underwater and bring them to the surface.

Peak Performance Buoyancy Your chance to fine-tune your buoyancy and soar over reefs, extend bottom time by reducing air consumption and prolong the life of your dive equipment. Observe aquatic life without disturbing their surroundings by improving the buoyancy skills you learned as a new diver and elevate them to the next level.

Underwater Naturalist Take the PADI Underwater Naturalist Specialty course and you'll see new things, even on the most familiar scuba diving sites. Know more about symbioses, underwater ecology, and aquatic plant and animal habitats, and see creatures you may have previously missed. Learn more about the local ecosystem and take a closer look on your next scuba diving adventure.

Upcoming AOW Dive Weekends At Dutch Springs:

June 22nd & 23rd

August 17th & 18th

October 19th & 20th

July 20th & 21st

September 21st & 22nd
