

# Enriched Air NITROX

more comfortable  
more individual  
more professional

## NITROX...

*Wonder what the mystique is?*

*Our PADI Enriched Air Diver Specialty course has the answers. By diving with enriched air, rather than standard air, you can extend your no decompression limits and shorten your surface intervals. This means more time underwater doing what we enjoy most. Diving!!*

## Class scheduled upon request

### Cost:

Academic materials - \$175.00 - Must go on Dosils.com & pay PADI directly for the Enriched Air eLearning - Must be completed before the class starts.

Class - Dosil's - \$119.00

### Price Includes:

A coupon good for the use of 2 Enriched Air Cylinders (Value \$60)

The PADI Enriched Air Specialty Course is conducted in 1 classroom session, and includes an academic review, a Practical Application session where you will learn how to analyze Enriched Air Cylinders, obtain Enriched Air and plan Enriched Air dives using an Enriched Air compatible dive computer, which is included during the Practical Application. The course is based on pre-study of the PADI Enriched Air Diver course online with PADI eLearning.

### Prerequisites:

You must be a Certified PADI Open Water Diver (or the Equivalent)

Minimum Age: 12. Must have 2 participants to run the class.

**Suggested Equipment For Class:**  
If you have a dive computer bring it to the class
